PRODUCTION PROCESS

Professional production, quality assurance

The following points need to be paid attention to when using the Multi-layer Drawer Tool Cabinet Pit Cart:

- ▶ Load limit: When moving the tool cabinet pit truck, you need to pay attention to the maximum load it can bear to avoid damage or danger caused by overload.
- ▶ Balance and stability: When moving the tool cabinet pit truck, it is necessary to ensure that the center of gravity is balanced and stable to avoid tilting, collapsing or overturning due to imbalance.
- ▶ Secure locking: When using a tool cabinet, ensure that all drawers and cabinet doors are properly closed to prevent theft or loss of stored tools and equipment.
- ▶ Cleaning and maintenance: regularly clean and maintain the tool cabinet, and check and lubricate the drawers and pit cars to maintain their normal use and prolong their life.
- ▶ Reasonable placement: When using the tool cabinet, it is necessary to arrange the storage position of the tools and parts in the drawer reasonably so that you can quickly

find the items you need. At the same time, it is also necessary to avoid stacking too many items together, which will affect the use effect of the cabinet.

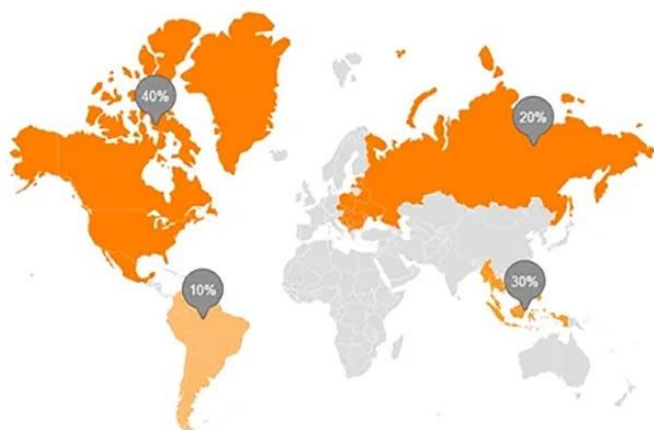

▶Moisture-proof and sun-proof: The **multi-layer drawer tool cabinet pit cart** should be placed in a dry, ventilated place and avoid direct sunlight to prevent tools or parts from rusting, deforming or being damaged.

▶Safe operation: When operating the tool cabinet pit truck, it is necessary to pay attention to the safe operation rules to avoid personal injury or other dangerous situations.
